WHAT IS DOGSPAD?

DOGS Pad is the premier IDO platform for the projects building on BSC, ETH and DogeChain platforms. DOGS Pad will empower meme crypto currency projects with the ability to distribute tokens and raise liquidity.

WHY CHOOSE US?

DOGS Pad has found a solution to incentivize and reward all token stakers in a way that is inclusive and with a low barrier to entry. The fundamental flaws of existing launchpads are that acquiring enough tokens to participate in the ecosystem is prohibitive, and even if you do stake the tokens, you are not guaranteed an allocation spot. They are based on a first come first serve basis where automated bots can fill the whitelist spots in a matter of seconds. DOGS Pad is creating fair decentralized launches, you can choose between a lottery tier or a guaranteed allocation tier and if you win the lottery, you get a guaranteed allocation in the first round (Allocation round).

The DOGS Pad is a two-round system that makes every tier level guaranteed an allocation. There is no first come first serve or bots, only fair distributed rewards for all participants.
